## **ENGIE GLOBAL MARKETS becomes new gas and power market maker in Germany for enmacc.**

Along with Wingas, Statkraft, OMV and Vattenfall, ENGIE Global Markets will be the fifth market maker, being active in gas on enmarket from the 15th of November onwards and starting its power market making operations in early 2019.

"We see ENGIE Global Markets as a strong European partner with whom we can also expand internationally", says Jens Hartmann of enmacc. Bernd Dinauer from ENGIE Global Markets is also looking forward to the cooperation: "We want to become more active in the German market and have found the perfect partner for this in enmacc". Bernd Dinauer adds: "As an innovative company, we enjoy working together with young, dynamic companies that have already proven themselves in the market."

ENGIE Global Markets started their digital transformation by implementing an own client platform to address the needs of an innovative energy landscape. Leveraging on this, ENGIE Global Markets and enmacc seek a successful cooperation. Enmacc clients have the opportunity to use enmarket's independent price screen for the bilateral trading of standard energy products.

If you have any questions regarding the adjustment of your framework agreements or if you are interested in a German framework agreement with ENGIE Global Markets, please contact Jonas Risse and Paul Raymond from the ENGIE Global Markets Origination Team:
